

CLAIMS

What is claimed is:

1. A multi-purpose hand tool, comprising:
a socket body having a socket at a first end;
a key tip; and
an arm portion connected between a second end of the socket body and the key tip.
2. The tool of claim 1, wherein the key tip includes a hex key tip.
3. The tool of claim 1, wherein the key tip defines a notch in an end of the key tip opposite the arm portion.
4. The tool of claim 1, wherein the arm portion defines an opening for receiving a torque arm device.
5. The tool of claim 1, wherein the tool includes a material selected from the group consisting of metal, metal alloys, steel and steel alloys.
6. The tool of claim 1, further comprising a plastic sheathing around the socket body.
7. The tool of claim 1, wherein the socket defines an opening for receiving a second tool.

8. A multi-purpose hand tool, comprising:
means for torquing a first female fastener;
means for socket wrenching a second fastener; and
an arm portion connected between the means for torquing and the means for socket wrenching.
9. The tool of claim 8, wherein the means for torquing includes a key tip.
10. The tool of claim 9, wherein the key tip includes a hex key.
11. The tool of claim 10, wherein the means for socket wrenching includes a socket body having a socket.
12. The tool of claim 11, wherein the arm portion is multi-sided.
13. The tool of claim 12, wherein the key tip defines a notch in an end of the key tip opposite the arm portion.
14. The tool of claim 13 wherein the arm portion defines an opening for receiving a torque arm device.

15. The tool of claim 14, further comprising a plastic sheathing around the socket body.

16. A set of tools, comprising:
a first tool including a first socket body having a first socket, a first key tip, and a first arm portion connected between the first socket body and the first key tip; and
a second tool including a second socket body having a second socket, a second key tip, and a second arm portion connected between the second socket body and the second key tip, wherein the first tool is removably interconnected to the second tool.

17. The set of tools of claim 16, wherein the second key tip and the second arm portion extend into a first opening defined by the first socket of the first tool.

18. The set of tools of claim 17, wherein:
the second socket of the second tool defines a second opening; and
the size of the first opening of the first tool does not equal the size of the second opening of the second tool.

19. The set of tools of claim 18, wherein a circumference of the first key tip of the first tool does not equal a circumference of the second key tip of the second tool.

20. The set of tools of claim 19, wherein:
the first key tip includes a first hex key; and

the second key tip includes a second hex key.
